Ref: Status Report on Dellar Landfill Closure Plan

Dear Mr. De Frate:

The last status report was submitted on April 22, 2009. From April 22,, 2009 to July 30, 2009, the following tasks have been accomplished to address the Corrective Action Order for the Dellar Landfill issued by the Central Valley Regional Water Quality Control Board:

1. The Department of Utilities continued to bring in dirt to stock pile on site for the closure of the site. The dirt came from a detention pond project and was tested for contaminants prior to be brought on site. The soil tested clean with hazardous waste. Approximately 90,000 cyds of fill material has been stock piled on the site, with an additional 240,000 cyds of fill material stock piled on the 28<sup>th</sup> Street Landfill to complete the closure work in the summer of 2010.
2. Ongoing monitoring after storm events is occurring to inspect for erosion and maintenance of the stock pile is being addressed.
3. The LEA inspected the site and found no standing water on site.
4. The City met with representatives of the Dellar Trust to discuss requirements to maintain the radio tower. These concerns will be addressed when completing the construction drawings and any changes will be shared with the Water Board prior to the construction bid documents being completed.
5. Funding for the closure work has been identified and a CIP was created to pay for the estimated closure cost at this time.
6. The Department of Utilities and Neighborhood Services continues to work with the City Police Department to keep homeless from camping on the property.

7. The property is being secured with a gate to keep Sutter Landing Park users from walking onto the site.

Sincerely,
